

Contrarius Global Equity Fund

This is a financial promotion/marketing communication. Please refer to the Fund's Prospectus, Supplemental Prospectus and Key Investor Information Document and seek your own independent financial advice tailored to your personal circumstances before deciding whether to invest in the Fund. Past performance does not predict future returns.

The Fund aims to earn a higher Total Rate of Return than the average of the world's equity markets, as represented by the MSCI World Index, including the reinvestment of dividends net of withholding tax ("Benchmark") (Bloomberg ticker code: NDDUWI Index). It aims to achieve this without greater risk of loss, over the long-term. The Fund is an actively managed fund, and as such does not in any way seek to replicate its benchmark index, but may instead differ materially from the performance benchmark in order to achieve its objective.

Fund information

Contrarius ICAV (the "ICAV") is an umbrella type open-ended Irish Collective Asset-management Vehicle with variable capital and segregated liability between sub-funds. The ICAV was originally incorporated in Jersey on 9 December 2008 (with registered number 102270) and was registered as an Irish Collective Asset-management Vehicle in Ireland by way of redomiciliation (continuation) under the Irish Collective Asset-management Act 2015 on 30 June 2016. The ICAV was authorised as a UCITS by the Central Bank pursuant to the UCITS Regulations on 30 June 2016. The initial sub-funds of the ICAV are Contrarius Global Equity Fund and Contrarius Global Balanced Fund.

Contrarius Global Equity Fund: The benchmark is an average of the world's equity markets, as represented by the MSCI World Index, including the reinvestment of net income (Bloomberg ticker code: NDDUWI Index). Since 30 June 2016, the Sub-Fund has been priced daily. From inception up to 30 June 2016, the Sub-Fund was priced weekly. Performance prior to 30 June 2016 was while the Sub-Fund was a Jersey domiciled fund. With effect from 1 July 2020, a separate Series is issued on each Dealing Day for subscriptions. Any shares issued prior to 1 July 2020 will be part of the Initial Series. Figures on this Fact Sheet relate to the Initial Series of the Fee Class.

Fund minimums

Notes to help you understand this Report

Certain capitalised terms are defined in the Glossary section of the Contrarius Funds' respective Prospectuses, copies of which are available on our website (www.contrarius.com). The country and currency classification for equity securities follows that of third party benchmark providers for comparability purposes. Based on a number of factors including the location of the underlying business, Contrarius may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding.

Largest drawdown is defined as the maximum percentage decline over any period, calculated on the total return of the Fund, based on the dealing frequency of the Fund.

Months to recovery relates to the largest drawdown period and measures the number of months from the preceding peak in performance to the recovery of that level of performance, based on the dealing frequency of the Fund.

Beta vs benchmark provides an indication of how the Fund's returns move in relation to changes in the benchmark's returns. It indicates how sensitive the Fund is to movements in the market, and is calculated using monthly performance since inception.

Tracking error vs benchmark measures the volatility of the difference between the returns of a fund and the benchmark, where larger tracking errors indicates the fund's return has historically deviated from the benchmark, and is calculated using monthly performance since inception.

5 year annualised weekly volatility is the standard deviation of the Fund's weekly return, and provides a measure of how much an investment's return varies from its average over time.

Active share is a measure of how actively managed the Fund is. It is calculated by summing the absolute value of the differences of the weight of each individual stock in the Fund, versus the weight of each holding in the MSCI World Index (the benchmark), and dividing by two.

Total Expense Ratio is a measure of the actual costs that have been deducted from the Fund over the past twelve months. TER is calculated using the expenses of the Fund, excluding Transaction Costs, and is for the Initial Series of the Fee Class.
